

LITERATURE SEARCH

ACQUIRED IMMUNODEFICIENCY SYNDROME (AIDS)

January 1980 through April 1983

179 Citations, including Addendum

Prepared by Charlotte Kenton

The bibliography covers citations to the current epidemic of serious illnesses associated with defects in the body's immune system. Populations at risk include homosexual or bisexual males, Haitian immigrants, hemophiliacs, and drug abusers, presenting with a broad range of opportunistic infections associated with cellular immunodeficiencies, Kaposi's sarcoma and other malignancies, lymphadenopathy, and pneumocystis pneumonia.

The Addendum (56 references) contains citations from the current daily receipt of journals in the Library, selected citations input to the April 1983 MEDLINE database, and supplementary publications pertaining to the epidemiology of this complex new medical disorder recognized since the original search was formulated.

This bibliography contains references to recent articles selected from some 3,000 English and foreign language journals and a limited number of monographs. Articles from these journals and monographs are indexed for inclusion in *Index Medicus* and other bibliographies produced by the National Library of Medicine. The references in this Literature Search were retrieved from NLM's MEDLINE data base; the dates above show the period during which the references were added to MEDLINE.

Each citation is listed with the descriptors selected from NLM's list of Medical Subject Headings (MeSH) under which the article was indexed. MeSH descriptors of most significance in an article are identified with an asterisk. The article cited will be found in *Index Medicus* only under these starred descriptors.

A bracketed title indicates the article is in a foreign language. For foreign language articles the designation ENG.ABSTR. follows the publication date if the article includes an English abstract; language abbreviation in parenthesis follows.

A full explanation of the elements included in each citation, as well as a complete list of current NLM Literature Searches are included in *Index Medicus and Abridged Index Medicus*. To obtain a current list of Literature Search titles, write: Literature Search Program, Reference Section, National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland 20209. Please include your name and address typed on a gummed label (no return postage necessary).
