TITLE I—SMALL BUSINESS INNOVATION RESEARCH PROGRAM

SEC. 101. SHORT TITLE.

This title may be cited as the “Small Business Innovation Research Program Reauthorization Act of 1992”.

SEC. 102. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress finds that—

(1) the small business innovation research program established under the Small Business Innovation Development Act of 1982 (hereafter in this Act referred to as the “SBIR” program) has been a successful method of involving small business concerns in Federal research and development;
(2) the small business innovation research program has
been an effective catalyst for the development of technological
innovations by small business concerns;
(3) small business innovation research program partici-
pants have provided high quality research and development
in a cost-effective manner;
(4) the innovative products and services developed by small
business concerns participating in the small business innovation
research program have been important to the national
defense, as well as to the missions of the other participating
Federal agencies;
(5) the small business innovation research program has
effectively stimulated the commercialization of technology
developed through Federal research and development, benefit-
ing both the public and private sectors of the Nation;
(6) by encouraging the development and commercialization
of technological innovations, the small business innovation
research program has created jobs, expanded business
opportunities for small firms, stimulated the development of
new products and services, and improved the competitiveness
of the Nation's high technology industries;
(7) the small business innovation research program has
also helped to increase exports from small business concerns;
(8) despite the general success of the small business innovation
research program, the proportion of Federal research and
development funds received by small business concerns has
not increased over the life of the program, but has remained
at 3 percent; and
(9) although the participating Federal agencies have suc-
sessfully implemented most aspects of the small business
innovation research program, additional outreach efforts are
necessary to stimulate increased participation of socially and
economically disadvantaged small business concerns.

(b) PURPOSES.—The purposes of this title are—
(1) to expand and improve the small business innovation
research program;
(2) to emphasize the program's goal of increasing private
sector commercialization of technology developed through Fed-
eral research and development;
(3) to increase small business participation in Federal
research and development; and
(4) to improve the Federal Government's dissemination
of information concerning the small business innovation
research program, particularly with regard to program partici-
pation by women-owned small business concerns and by socially
and economically disadvantaged small business concerns.

SEC. 103. AMENDMENTS TO SMALL BUSINESS INNOVATION RESEARCH
PROGRAM.

(a) DEFINITION OF THE SMALL BUSINESS INNOVATION RESEARCH
PROGRAM.—Section 9(e)(4) of the Small Business Act (15 U.S.C.

commercial potential, as described in subparagraph (B)(ii),"

business concerns participating in the small business innovation
research program have been important to the national
defense, as well as to the missions of the other participating
Federal agencies;
(5) the small business innovation research program has
effectively stimulated the commercialization of technology
developed through Federal research and development, benefit-
ing both the public and private sectors of the Nation;

of technological innovations, the small business innovation
research program has created jobs, expanded business
opportunities for small firms, stimulated the development of
new products and services, and improved the competitiveness
of the Nation's high technology industries;
(7) the small business innovation research program has
also helped to increase exports from small business concerns;
(8) despite the general success of the small business innovation
research program, the proportion of Federal research and
development funds received by small business concerns has
not increased over the life of the program, but has remained
at 3 percent; and
(9) although the participating Federal agencies have suc-
sessfully implemented most aspects of the small business

(i) with respect to each such agency, whether or not there has been a demonstrable reduction in research quality; and

(ii) in the case of such reduction, whether an increase in each such agency's required SBIR participation in accordance with section 9(f)(1) of the Small Business Act (as amended by subsection (b) of this section) would adversely affect the performance of the agency's research programs;
