FDA

Biologics Regulation and Research: The People and Work of Buildings 29 & 29A

Buildings 29 and 29A are nationally significant to the history of medicine and public health because within their laboratories National Institutes of Health (NIH) and then the Food and Drug Administration (FDA) staff helped to conquer some of the deadliest infectious diseases.

NCI

Michael Potter: The Work of Michael Potter

Michael Potter investigated the twin questions of what causes cancer and how we produce the antibodies called immunoglobulins which protect us from disease.

NHLBI

Marshall Nirenberg: Deciphering the Genetic Code

Explore the Nobel Prize-winning work of Marshall Nirenberg, who deciphered the genetic code with the help of NIH colleagues, enabling genetics to become a central scientific field.

Building 10

The Stadtman Way: A Tale of Two Biochemists at NIH

The scientific power couple of Thressa and Earl Stadtman developed a unique way to train scientists; they each made significant scientific contributions too.

Building 10

• **Biologics Regulation and Research: The People and Work of Buildings 29 & 29A**

Buildings 29 and 29A are nationally significant to the history of medicine and public health because within their laboratories National Institutes of Health (NIH) and then the Food and Drug Administration (FDA) staff helped to conquer some of the deadliest infectious diseases.

The AMINCO-Bowman Spectrophotofluorometer

The colorful glow of fluorescent chemicals can identify and measure tiny amounts of substances in the body. This spectrophotofluorometer invented by Robert Bowman did just that.

NIBIB

NIBIB: Improving Health Through Emerging Technologies

Learn about cutting-edge research funded by the National Institute of Biomedical Imaging and Bioengineering. Building 31

[FDA](#) | [NCI](#) | [NHLBI](#) | [NIAID](#) | [NIBIB](#) | [NICHD](#) | [NIDCR](#) | [NIDDK](#) | [NINDS](#) | [ORS](#)

NICHD

A Thin Blue Line: The History of the Pregnancy Test Kit

Discover the history of the home pregnancy test—developed at the NIH—and examine its place in our culture.

[FDA](#) | [NCI](#) | [NHLBI](#) | [NIAID](#) | [NIBIB](#) | [NICHD](#) | [NIDCR](#) | [NIDDK](#) | [NINDS](#) | [ORS](#)

NIDCR

Converging Pathways of Pain Research at NIDCR

Pain is a universally known and feared human condition, but it's also one of the least understood. Learn about NIH research on different facets of pain.

[FDA](#) | [NCI](#) | [NHLBI](#) | [NIAID](#) | [NIBIB](#) | [NICHD](#) | [NIDCR](#) | [NIDDK](#) | [NINDS](#) | [ORS](#)

NIDDK

Christian Anfinsen: Protein Folding and the Nobel Prize

How are proteins made? How do they fold, and what role does structure play in their function? Chris Anfinsen's investigations answered these questions; they also led to a Nobel Prize.

[Building 10](#)

Martin Rodbell: How Cells Respond to Signals

Studying hormones, Martin Rodbell discovered how cells respond to signals, explaining how our body makes sense of the world. For his work, he was awarded a Nobel Prize.

Drugs as Opiates, Drugs as Research Tools: Synthetic Opiates & Opioids

Learn how the NIH Total Opiate Synthesis freed us from dependence upon flowers for painkillers and opened the door to new ones.

[FDA](#) | [NCI](#) | [NHLBI](#) | [NIAID](#) | [NIBIB](#) | [NICHD](#) | [NIDCR](#) | [NIDDK](#) | [NINDS](#) | [ORS](#)

NINDS

Roscoe Brady & Gaucher's Disease

Is there a disease? What causes it? Can we prevent, treat, or cure it? Roscoe Brady's research into Gaucher's disease answered all three questions.

[FDA](#) | [NCI](#) | [NHLBI](#) | [NIAID](#) | [NIBIB](#) | [NICHD](#) | [NIDCR](#) | [NIDDK](#) | [NINDS](#) | [ORS](#)

ORS

Howard Bartner & 40 Years of Medical Illustration

Howard Bartner, an NIH medical illustrator, devoted 40 years to portraying human anatomy in his drawings.

Early-Stage Breast Cancer

Medical Posters

Discover a collection of 24 medical posters drawn by artists at the NIH, representing topics from arthritis to women's health.
